

ALABAMA SCIENCE AND ENGINEERING FAIR

April 3 – April 5, 2008

RULES FOR EXHIBITS

NOTE: Refer to ISEF Rules Manual for All Rules

The rules governing the Alabama Science and Engineering Fair are identical to those required by the International Science and Engineering Fair. **These rules must be strictly complied with in order for an exhibit to be eligible for awards. Several certifications are required prior to the start of any actual experimentation.** Copies of these rules are available from Science Service, Inc., 1719 N Street, Washington, D.C. 20036-2888 or on their web page (http://www.societyforscience.org/isef/about/rules_regulations.asp).

These rules apply to all science fairs which have affiliation with the International Science and Engineering Fair, and, therefore must be applied at all regional science fairs which participate in the Alabama Science and Engineering Fair.
