RockOn! is a workshop where teams will learn through hands-on activities, how to build a payload or RocketSat. Teams will build their RocketSat in 4 days and launch it on sounding rocket to ~73 miles on the 6th day. The hardware in the kit will be able to be used on future RocketSat/CubeSat flights. Wallops will be providing the rocket/launch operations. This workshop is planned for June 16-21, 2012.
