

UAHuntsville

Department of Civil and Environmental Engineering JUMP (BS-MS Accelerated Program)

1. Students apply for admission through their department using the BS-MS Accelerated application.
2. Students may only apply to programs previously approved.
3. The admission standards for each approved program apply; however students must have at least a 3.5 cumulative GPA to apply.
4. GRE is not required.
5. Students may apply following successful completion of the 98 credit hours. By the end of the following summer, the students would start officially enrolled in the Program.
6. Students are considered as graduate students when taking 500 or above courses and must meet the normal graduate academic standards for the courses.
7. No more than 12 hours of graduate courses may be taken in this program as an undergraduate and counted in the graduate program.
8. Students are considered undergraduate students until all requirements for their undergraduate degree are met.
9. Students will pay undergraduate tuition for grad courses taken as an undergrad and listed on the application as part of this program.
10. Students cannot hold a GTA, GRA, or graduate scholarship or fellowship until their undergraduate degree is completed.
11. Students must take the courses that are listed on their application to the program. These must be included in the UG program of study as well. If a change is made a Change of POS request form must be submitted for approval.
12. If the GPA is less than a 3.5 for the undergraduate degree, the student does not receive admission to the graduate program automatically after they finish their undergraduate degree. They must then apply to the graduate school with an admission test score (GRE, GMAT...) and their courses would be treated as if they had been a non-degree graduate student and now wanted to become degree seeking. Up to 12 hours taken in the combined program with a grade of B or better could then be used in the graduate degree program if they were admitted.
13. The six year time limit for courses in the masters program starts when the courses are taken, even if they are taken as part of the undergraduate program. Validation procedures are the same as for any graduate student.
14. International students must be issued a new I-20 for their graduate program and must submit new financial documents, the same as if they were going from undergraduate to graduate school at UAHuntsville without the combined program. To accomplish this they should see the international graduate admissions office within the first two weeks of the semester in which they will graduate.
