I. Introduction and Objective

A. Overview

It is the policy of the University of Alabama in Huntsville (UAHuntsville) to quickly inform the University community of conditions posing a threat to life, safety, and security and/or property, so that members of the community can take the necessary precautions to ensure overall safety and security including that of lives and property. UAHuntsville will utilize multiple communications modes to reach the largest feasible percentage of the impacted population, provided such notification does not compromise efforts to contain the emergency.

UAHuntsville employs an Emergency Notification System (ENS) to provide emergency warnings and follow-up information to the campus community, prior to and during an emergency. The system uses a variety of methods to furnish information and direction so that campus community members may immediately protect themselves in an emergency situation.

The Emergency Notification System (ENS) shall be commonly known as “UAlert.” (The terms ENS and UAlert will be used interchangeably in this Policy.) UAlert includes the following primary modes of notification:

- Text/Short Message Service (SMS) to cellular phones
- Voice phone messages to non-UAHuntsville land lines and cellular phones
- Voice phone messages to UAHuntsville telephones
- E-mail to UAHuntsville official e-mail addresses
- E-mail to non-UAHuntsville e-mail addresses

The following alternate modes of message delivery will be utilized as deemed appropriate by a Responsible Authorizer to a specific situation, especially one as to which notification should be disseminated to the larger Huntsville/North Alabama community:

- UAHuntsville web site (www.uah.edu)
- UAHuntsville Emergency web site (emergency.uah.edu)
- UAHuntsville official social media sites
  - Twitter: www.twitter.com/UAHuntsville
  - Facebook: www.facebook.com/UAHuntsville
- Local media
- Other modes as acquired and implemented

The protocols include the activation of a system for issuing appropriate warning or follow-up informational messages on campus and the use of other communications
systems as necessary. This Policy addresses internal and external communications and is intended to be used as an adjunct to the UAHuntsville Emergency Communications Plan and to the unit-specific emergency response plans, which every unit at the University should have in place.

B. Definitions

Emergency Notification – message issued to alert the campus of a confirmed, active emergency that poses an immediate threat to life, safety, and security and/or property where there is no time to issue advance warning (and the warning must be issued at the time the emergency is occurring). This message notifies the recipient that he/she needs to take protective action. Examples of such events or incidents include, but are not limited to, severe weather/tornado warning, an active shooter incident, a “gunman” at large, an immediate life-threatening and wide-spread hazardous material incident, a bomb located, or other serious in-progress potentially deadly incidents. Such threats may either be on-campus or off-campus in the immediate area of University owned, operated, and/or controlled property. Only those threats requiring immediate action by community members may result in the activation of the emergency notification protocol.

Crisis Alert – message alerting to a confirmed potential emergency situation that poses a reasonably likely threat to life, safety, and security and/or property where there is a limited time to prepare and issue advance warning. Such threats may either be on-campus or off-campus in the immediate area of University owned, operated, and/or controlled property. Crisis alerts may also include urgent follow-up instructions or information on an ongoing emergency (one where an emergency notification has previously been issued and a threat is still present).

Status Update/All Clear Alert – message that disseminates follow up information or non-urgent instructions. This may be a Status Update on an ongoing or imminent crisis event about which campus community members must be advised to ensure their health and safety, or an All Clear message that the emergency situation has been contained or no longer exists. This information is given with the intention of being helpful, though no individual action is immediately required.

Confirmed Threat – event confirmed by UAHuntsville Police Department (UAHPD) or another Responsible University Authority (see II.B) as an emergency situation that poses an immediate or reasonably likely threat to life, safety, and security and/or property.

Responsible Authorizer – a person who provides approval for the issuance of a notification.

Responsible Activator – a person who performs the technical activity of issuing or broadcasting a notification.
UAlert – the University branding for its emergency notification system (the collective group of centrally controlled emergency notification methods utilized by the University).

II. Operational Guidelines

A. Purpose and Authority of Emergency Notification System Policy

The purpose of UAlert is to authorize and issue safety and security warnings and follow-up informational messages to the campus population in an emergency when specific actions must be taken to maintain safety and security on campus.

This Policy provides operational guidelines for issuing emergency messages via UAlert. The Policy is integrated with and supplements the UAHuntsville Emergency Communications Plan. The protocols also provide visible leadership and establish communication procedures to ensure that University officials and staff members are familiar with both actions to be taken and their specific roles.

This Policy has been approved by the Emergency Management Operations Group (EMOG) of which the University President is the chair.

B. Responsible University Authorities

At all times, reference to any position at the University shall be understood, in the absence of the referenced individual, to include designees. The following University positions, collectively referred to as “Responsible Authorizers” for the purposes of these protocols, are granted authority by the University President to authorize emergency notifications, crisis alerts, and status updates/all-clear alerts:

- **University President** (send initial emergency notification, crisis alerts, and/or status update/all-clear alerts)
- **Chief of Police / Director of Public Safety or designee** (send initial emergency notification, crisis alert, and/or all-clear alerts)
- **UAHPD Lieutenant** (send initial emergency notification, crisis alerts, and/or all-clear alerts)
- **UAHPD Senior Officer on Duty** (send initial emergency notification)
- **Director of Public Affairs/Public Information Officer (PIO)** (send crisis alerts and/or status update)
- **Incident Commander** (send initial emergency notification, crisis alert, and/or status update/all-clear alerts)
The following University official(s) are authorized if they are *directly involved with and have situational awareness for the emergency response or crisis situation at UAHuntsville*:

- Provost and Executive Vice President for Academic Affairs (send initial emergency notification and/or crisis alerts)
- Vice President, Finance & Administration (send initial emergency notification and/or crisis alerts)
- Assistant Vice President, Facilities & Operations (send initial emergency notification, crisis alert, and/or all-clear alerts)
- Director, Office of Environmental Health & Safety (send initial emergency notification, crisis alerts, and/or all-clear alerts)

The following University positions, collectively referred to as “Responsible Activators” for the purposes of these protocols, are granted authority by the University President to activate the UAlert system to issue approved emergency notifications, crisis alerts, and status updates/all clear alerts:

- Police Dispatchers (execute an approved order to transmit an emergency notification message)
- Police Assistants (execute an approved order to transmit an emergency notification message)
- Designees appointed by a Responsible Authorizer and properly trained in system utilization (execute an approved order to transmit an emergency notification message in the absence of available or trained Police Dispatchers)
- Responsible Authorizers properly trained in system utilization (execute an approved order to transmit an emergency notification in the absence of available or trained Police Dispatchers)

It should be noted that Responsible Authorizer and Responsible Activator are not mutually exclusive groups; a Responsible Authorizer may also be a Responsible Activator and vice versa.

**C. Reporting an Emergency Situation**

Individuals should immediately report all emergency or hazardous situations on campus to the UAHPD. UAHPD may be reached as follows:

- 6911 from a campus phone
- 256-824-6911 from a cellular or off-campus phone
- 911 from any phone (off-campus calls go to Madison County 9-1-1 Center).
Individuals should report as much information as possible:

- Nature of the emergency situation
- Where it is occurring
- Physical description of person(s) involved, if applicable

If safe to do so, remain on the phone with dispatchers and provide additional information until the first police officer arrives.

**Responding to emergency situations:** Individuals should not approach a hazardous or dangerous situation. Persons should refer to the UAHuntsville *Emergency Procedures Handbook* for information on protective actions to take during an emergency.

The *Emergency Procedures Handbook* contains specific instructions about building evacuation and procedures to be followed in responding to other kinds of emergencies. A printed copy should be available in each classroom, laboratory, and office and is available on the UAHuntsville web site at this web address: (http://emergency.uah.edu/handbook.pdf).

**D. Initial Activation of the Protocols**

For the purposes of these protocols, “authorizing” and “issuing” notifications are distinct activities and responsibilities. In the interest of timely notification, these protocols do not contain a separate approval procedure for the language of a notification. The use of pre-approved “canned” message templates, with appropriate specifics inserted prior to issuance, will help to speed the process of issuing alerts. See Appendix B for a list of approved “canned” messages.

**Confirming a threat or hazard situation:** The activation process is initiated when an emergency posing an *immediate* or *reasonably likely* threat to life, safety, and security and/or property is reported to UAHPD or to another Responsible University Authority. UAHPD or other Responsible University Authority must confirm that a reported threat exists and is of a nature requiring immediate notification to protect lives and property and must determine the impacted population that should receive or be the focus of the notification.

1. **UAHPD:** UAHPD officers responding to a report of an emergency situation shall utilize their professional training and judgment to determine whether the reported situation poses an immediate threat or is reasonably likely to pose a threat to life, safety, and security and/or property. For situations where there is an ongoing or progressive threat or where a given circumstance is reasonably likely to pose a
threat, the responding officer(s) shall follow UAHPD protocol to ensure proper activation of the UAlert system in accordance with this Policy.

2. **Responsible Authorizers:** Responsible Authorizers (other than UAHPD personnel) receiving a report of an emergency situation should immediately notify UAHPD and request confirmation that a hazard exists and poses an immediate threat or is reasonably likely to pose a threat to life, safety, and security and/or property. Responsible Authorizers who personally witness or observe a hazard condition that poses, or is reasonably likely to pose a threat to life safety should contact UAHPD to directly authorize a UAlert message and to appraise the police about the observed threat.

**Issuing an alert:** For confirmed threats to life, safety, and security and/or property, the UAHPD senior officer on duty, or another Responsible University Authority having situational awareness of the emergency situation, will authorize the appropriate warning or follow-up informational message based on the operational guidelines of this Policy.

These actions are to be taken without delay, unless issuing a notification will, in the professional judgment of the Responsible Authorizer, compromise efforts to assist a victim or to contain, respond to, or otherwise mitigate the emergency situation.

The following occurrences would ordinarily be regarded as constituting a threat to life, safety, and security and/or property:

- Accidents involving utilities (such as a gas leak)
- Hazardous materials incidents
- Violent crimes
- Severe weather / tornado warning
- Other occurrences or reasonably likely occurrences where the notification of the public reduces or eliminates the threat to life, safety, and security and/or property.

The above list is not intended to be all-inclusive but to provide guidance as to when the UAlert system may be used to enhance public safety.

The UAlert system shall not be activated to convey information that is unrelated to an active or potential emergency situation. Informational communications, other than status updates or “all clear” messages as defined herein, shall be governed by the appropriate policy section of the Emergency Communications Plan, and shall utilize the appropriate delivery modes and authorization channels as specified in that blanket policy.
E.  Message Language

1. Message wording is approved by the person authorizing the warning as outlined in Section II.B.
2. Length of message is bound by distribution method selected; i.e., text messages are limited to 150 characters, voice messages are limited to 25 to 30 seconds.
3. When feasible, messages should include several key elements:
   a. Indication that the notification is from the University in the beginning of the message.
   b. Description of the emergency situation or hazard condition.
   c. Description of the impacted population; i.e., people in specific buildings, people in a certain area of campus, or the entire campus.
   d. Actions the impacted population should take; i.e., evacuate building, avoid area of campus, or shelter in place.
   e. Referral to the University web site Home Page for additional information and updates when appropriate.

F.  Training and Exercising

UAHuntsville recognizes that training and exercising are essential to demonstrating and improving its ability to execute its UAlert protocols. Periodic exercising helps ensure that equipment and procedures are maintained in a constant state of readiness and may help identify issues and determine functionality before an emergency occurs.

1. Responsible Authorizer Training: Administrators and staff with UAlert authorization responsibilities will receive initial training on the emergency notifications protocols and process. Responsible Authorizers will be trained and exercised on the UAlert system annually. This group will be informed when UAlert policies, protocols, or system characteristics/capabilities are changed or updated, and additional training will be completed prior to or concurrently with such changes or updates. Such training shall be coordinated with and provided through UAHPD.

2. Responsible Activator Training: Administrators and staff with UAlert activation responsibilities (responsible for the technical activation of the UAlert system) will receive initial training on UAlert policies, protocols, and processes. This group will be trained and exercised on the UAlert system annually. In addition, this group will receive user training pertaining to the use and functionality of the UAlert system and its individual components. This group will be informed when UAlert policies, protocols, or system characteristics/capabilities are changed or updated, and additional training will be completed prior to or concurrently with such changes or updates. Such training shall be coordinated with and provided through UAHPD.
3. **Cross Training:** Cross-training will be employed to ensure trained staff are available to activate UAlert systems in an emergency. Departments/administrative units having personnel with UAlert activation responsibilities shall ensure that sufficient staff are trained in order to address leave, travel, and other planned and unplanned personnel absences.

4. **Position Successor Training:** Persons named in lines of succession for a Responsible Authorizer or Responsible Activator shall receive the same level of training as the position to which they might succeed.

5. **Refresher Training – Faculty and Staff:** It shall be the responsibility of each department/administrative unit head to ensure that all faculty and staff receive annual refresher training for the UAlert system and for all department/administrative unit-specific emergency response plans.

6. **New Hires and Transfers – UAlert Responsibilities:** New staff with UAlert roles will be trained on their UAlert role as they assume their University positions. Individuals who are currently employed by the University and transfer to a position with UAlert responsibilities must receive initial training immediately upon assuming the new position.

7. **Undergraduate Student Training:** Undergraduate students shall receive orientation training for the UAlert system during their orientation session. Students residing in University Housing shall receive additional orientation training from University Housing staff at the beginning of each academic semester. UAHPD and the PIO, with input from Enrollment Services and University Housing, will develop and maintain training materials and programs for student UAlert orientation.

8. **Graduate Student Orientation –** Graduate students shall be provided with a brief summary of the UAlert system, including how to update contact information and set contact priorities. This information should be provided along with acceptance letters. UAHPD and the PIO, with input from the School of Graduate Studies, will develop and maintain educational materials for graduate student UAlert orientation.

9. **General Faculty and Staff – New Hires:** Faculty and staff with no ENS authorization or activation responsibilities shall receive initial UAlert orientation training from Human Resources during their new-hire orientation. It shall be the responsibility of the individual’s supervising Administrator, Dean, Department Chair, Center Director, or designee to ensure that the individual is familiar with UAlert and the departmental/administrative unit emergency response plan(s) and that the individual receives annual refresher orientation on both. UAHPD and the PIO, with input from Human Resources, will develop and maintain UAlert training materials and programs for Faculty and Staff.

10. **General Faculty and Staff – Transfers:** It shall be the responsibility of the individual’s supervising Administrator, Dean, Department Chair, Center Director, or designee to ensure that an individual who transfers into a new position is familiar
with UAlert and the departmental/administrative unit emergency response plan(s) and receives orientation on both.

**Responsibilities for Training Program:** UAHPD and the PIO will collectively and cooperatively develop and maintain UAlert training materials and programs for all campus stakeholders.

1. UAHPD shall provide notifications each academic semester to remind departments/administrative units of the required annual refresher orientation for faculty and staff.
2. The PIO, in coordination with Administrators/Deans/Department Chairs/Center Directors, shall ensure that all personnel with UAlert authorization/activation responsibilities, including those named within this Policy as well as their alternate(s)/successor(s), have received proper training in their respective UAlert role(s) and subsequently receive annual refresher training as outlined above.
3. UAHPD shall be responsible for maintaining a training database and for providing periodic training status reports to the PIO and Emergency Management Operations Group (EMOG).

**Exercise Program:** The University will conduct a minimum of one (1) announced or unannounced UAlert test exercise each academic semester. UAHPD, the PIO, and the Emergency Management Coordinator will plan and coordinate UAlert exercises. Announced exercises will be widely publicized in advance to ensure that:

1. The University community is aware of the exercise and thus is not confused or surprised by the test message(s).
2. University community members have the opportunity to check and update their contact information prior to and immediately after the exercise.

At least one (1) unannounced exercise shall be conducted annually.

Each exercise shall be evaluated and After-Action Reports will be utilized to review system and personnel performance and to identify system strengths and areas for improvement. The following information shall be documented for each exercise:

- Date and time conducted
- Type of exercise (announced or unannounced)
- Evaluative comments and After-Action Report

Documentation shall be maintained by UAHPD and the Emergency Management Coordinator.
G. System Maintenance and Readiness

The UAlert system contact information database will be updated each academic semester. The update will add new students and employees and delete terminated employees and non-active students.

Information Technology Solutions (ITS):

1. ITS will develop the necessary processes to retrieve an updated user list from Banner® and transmit it to the appropriate vendor and/or University maintained database(s). The following information should be included for each active student and employee:
   - First and last name
   - UAHuntsville “A” number
   - UAHuntsville official e-mail address
   - Alternate e-mail address (if available)
   - Office phone number (if available)
   - Cellular phone number (if available)
   - Alternate (or home) phone number (if available)
   - SMS/Text Device (cellular number if no alternate supplied)
   - UAHuntsville building code (faculty, staff, student residents)

   This information shall be provided to UAHPD no later than 10 business days after the start of each academic semester.

2. ITS will ensure that UAHPD has redundant internet access capabilities and that UAHPD networks and associated infrastructure are maintained in a secure and resilient state. Where present, TCP/IP network connections between UAHPD administered emergency notification control interface(s) and building notification systems and/or alarm systems shall be maintained in a secure and resilient state.

3. ITS will maintain a secure web portal (http://ualert.uah.edu and http://www.uah.edu/ualert) that allows current students, faculty, and staff quick access to their UAlert accounts for the purposes of updating contact information. ITS will work in collaboration with UAHPD and the current text/SMS, telephone voice messaging, and mass email provider(s) to ensure a functional user-friendly interface. The web site will at a minimum contain the following:
   a) A link to an electronic version of this Policy (without confidential appendices).
   b) A brief description of the UAlert system and all current modes of delivery:
      - Modes that may be opted out of or reinstated.
      - Mandatory modes.
      - Alternate modes as developed and implemented.
   c) Instructions on how to access and update one’s UAlert account.
   d) Secure login portal to access one’s UAlert account.
**Enrollment Services:** Responsibilities for capturing and recording information for new and existing students shall reside with Enrollment Services. Enrollment Services shall develop and implement policies and protocols to ensure that:

1. A brief description of UAlert is included in recruitment materials and/or enrollment documents. Where possible and practicable it is recommended that students be briefed on the UAlert system at the time of registration.
2. Personal cellular phones number(s), when available, are entered into the proper Banner® field(s) within the Banner® student record.
3. Alternate (non-UAHuntsville) e-mail address(es), when available, are entered into the proper field(s) within the Banner® student record.
4. The above contact information, if not voluntarily provided, is requested at the time of enrollment. Students are to be advised as to how the contact information shall be used and that failing to provide it will prevent them from receiving emergency warnings and follow-up information through modes of delivery based on the University’s possession of students’ contact information.
5. Students wishing to opt out of the UAlert system complete and sign an opt-out form which clearly indicates their understanding that they will not receive emergency UAlerts through Text/SMS, telephone voice messaging, or alternate (non-UAHuntsville) e-mail addresses. (Minors would be required to have parent or guardian signature in order to opt out.)
6. Opt-out forms are forwarded to UAHPD.

**Human Resources:** Responsibilities for capturing and recording UAlert contact information for new employees shall reside with Human Resources. HR shall develop and implement policies and protocols to ensure that:

1. New employees are briefed on the UAlert system at the time of hire. It is recommended that a brief description of UAlert be included in each new hire package.
2. Personal cellular phone number(s), when available, are entered into the proper Banner® field(s) within the Banner® employee record.
3. Alternate (non-UAHuntsville) e-mail address(es), when available, are entered into the proper field(s) within the Banner® employee record.
4. The above contact information, if not voluntarily provided, is requested at the time of hire. Employees are to be advised as to how the contact information shall be used and that failing to provide it will prevent them from receiving emergency warnings and follow-up information through modes of delivery based on the University’s possession of employees’ contact information.
5. Employees wishing to opt out of the UAlert system at time of hire are required to complete and sign a voluntary opt-out form which clearly indicates their
understanding that they will not receive emergency UAlerts through Text/SMS, telephone voice messaging, or alternate (non-UAHuntsville) e-mail addresses.

6. Opt-out forms are forwarded to UAHPD.

UAHuntsville Police Department: UAHPD shall be the administrator for the UAlert system and shall ensure that:

1. The system is maintained in a constant state of readiness.
2. The contact database is current and updated at the beginning of each academic semester.
   a. Students who have been inactive for three (3) consecutive academic semesters shall be removed from the UAlert system.
   b. Employees whose employment has ended at least ninety (90) days prior to the start of the current academic semester shall be removed from the UAlert system unless the former employee is a currently enrolled and active student.
3. Contact information, with the exception of official UAHuntsville e-mail addresses, for persons with documented opt-out requests is not loaded into UAlert. (Accounts will be created for ALL students, faculty, and staff. See section III.B for additional details.)
4. Adequate numbers of trained UAHPD staff (both UAlert authorizers and activators) are on duty at all times.
5. All Responsible Authorizers and Responsible Activators (both UAHPD staff and other University employees as named above and their immediate successors) are fully trained in their UAlert responsibilities and system operation and receive annual training updates.
6. A user-friendly and functional web interface/portal for current students, faculty, and staff is maintained, with ITS, to allow individuals to update their UAlert contact information.
7. UAlert special call/alert groups are designated and maintained, including but not limited to:
   a. Emergency Management Operations Group (EMOG) personnel
   b. Student Residents according to assigned residence structure
   c. UAHPD personnel
   d. Faculty/staff by primary work location (building)

H. Personal UAlert Account Maintenance

Faculty, staff, and students may review and update their UAlert account information through the UAlert web portal: http://ualert.uah.edu. UAlert login ID shall be the individual’s official UAHuntsville LDAP ID (the first part of the official UAHuntsville

Page 12 of 15
email address), and the password shall be the registered LDAP password (the password used to access UAHuntsville e-mail and wireless networking systems).

The following personal information and preferences may be updated via the UAlert portal:

- Contact order (priority) for all provided contact methods
- Cellular, office, and home (or alternate) phone numbers
- Alternate e-mail address
- Address

Where applicable, users must accept the third-party notification provider’s disclaimers in order to update personal information.

Academic Affairs: It is recommended that all course syllabi include a brief description of UAlert and include the internet address (http://ualert.uah.edu) which students may use to review and/or update their UAlert contact information and preferences.

### III. UAlert Participation

#### A. Opt-Out Policy

UAHuntsville recognizes the need to notify as many members of its campus community as possible during an emergency situation. Participation in the text/SMS, telephone voice messaging, and alternate (non-UAHuntsville) e-mail notification components of UAlert shall be on an opt-out basis except as specified otherwise in Sections III.B and III.C below.

Information as outlined in section II.G.1 above shall automatically be loaded into the UAlert database (vendor hosted or UAHuntsville hosted as appropriate to the current contractual agreement with the current service provider) at the start of each academic semester for all students, faculty, and staff who do not have a written opt-out form on file.

#### B. Mandatory Inclusion of Official UAHuntsville E-mail Addresses

All official UAHuntsville e-mail addresses for current students, faculty, and staff will remain in the UAlert system. Students, faculty, and staff may opt-out of all other text/SMS, telephone voice messaging, and alternate email UAlert notification channels (except as specified in Section III.C).
This shall require that each current student, faculty member, and staff person have an active UAlert account.

C. Mandatory Inclusion of UAHuntsville-Provided Wireless Electronic Communications Devices

All faculty and staff who have portable wireless electronic communications devices provided by the University shall be required to participate in the UAlert system by providing the contact information for each provided device.

For the purposes of this Policy, “provided by the University” shall be defined as any device either owned directly by the University and provided for individual use for official University business and any device owned by an individual but reimbursed by the University through the Wireless Communications Devices Policy.

Wireless electronic communications devices include:
- Cellular phones (including Blackberries, Nextel radio/phones, iPhones, Droids)
- Pagers (voice and digital)
- Personal Digital Assistants (PDAs) capable of receiving text/SMS and/or e-mail
- PDA/cellular phone combinations
- Other wireless devices capable of receiving text/SMS or e-mail

UAHuntsville Wireless Communications Devices Policy and related forms and documents shall include this requirement and shall require the employee to acknowledge and document compliance with this requirement.

D. Inclusion of Non-UAHuntsville Personnel

Non-UAHuntsville individuals who work on the UAHuntsville campus in either a full- or part-time capacity are eligible to participate in UAlert. This includes, but is not limited to, employees of the following groups:

- NASA employees
- United States Armed Forces employees
- Department of Homeland Security employees
- Food service employees
- Bevill Center employees
- University Fitness Center employees
- U.A. System employees
- Alabama Credit Union employees
- Other State and Federal employees
- Private industry employees and contracted employees
- Full- and part-time UAHuntsville volunteer staff
These groups shall be responsible for requesting access through their official University liaison. (For example: food service and Bevill Center employee groups would make their request through the Vice President for University Housing and Campus Business Operations; U.A. System auditors would make their request through the Controller’s office.) Those liaisons shall be responsible for informing non-UAHuntsville groups of the UAlert system and for providing an annual reminder to update contact information.

The groups will be required to provide all available information as outlined above in Section II.G.1 at the beginning of each academic semester. Groups will be responsible for supplying current information and for requesting removal of individual accounts. Groups should contact UAHPD for guidance on proper formatting for data submission.

### E. Caller ID Information for Incoming UAlert Messages

Telephone and text/SMS incoming messages will display the UAlert informational callback telephone number when message recipients have caller ID services activated: 256-824-7100. UAlert participants are encouraged to program this phone number into cellular phone and other contact lists so that devices will indicate the call is from UAlert.

### IV. Policy Maintenance

This Policy shall be reviewed and updated on an annual basis or sooner whenever changes to organizational structure, assigned responsibilities, UAlert system capabilities, or other factors affecting this Policy or the UAlert system occur.

The PIO as chair of the Emergency Communications Planning Committee (a subcommittee of the EMOG) is responsible for conducting all Policy reviews and updates. The EMOG has final approving authority for all Policy changes.

The Emergency Management Coordinator is responsible for maintaining the Policy document and incorporating changes approved by the EMOG, and will work with the PIO and during each update period to provide draft and final versions of this Policy.

A record of all Policy reviews and revisions shall be maintained in Appendix B of this Policy.

Emergency Notification System (UAAlert) Policy

APPENDIX B (CONFIDENTIAL)

Approved Pre-scripted (“Canned”) UAlert Messages

The following is a list of all currently approved pre-scripted (“canned”) emergency notification messages contained within the UAlert system:

Effective Date: August 2010

Prebuilt scenarios for immediate delivery:

1. **Active Shooter Scenario:**
   - **Lockdown Shots Fired**
     Close/secure doors-Take shelter-Be silent-Avoid sudden moves-Silence phones-Call 256-824-6911 for help

2. **Report of Shots Fired Scenario:**
   - **Lockdown Gun Shots Reported**
     Stay inside-Close/secure doors-Emergency Personnel responding-Call 256-824-6911 for help

3. **Hostile Intruder Scenario:**
   - **Lockdown Hostile intruder w/weapon**
     Secure doors-Take shelter-Be silent-Silence cell phones-Do not provoke intruder-Call 256-824-6911 for help-Avoid area

4. **Hostage Situation Scenario:**
   - **Hostage Situation**
     Take shelter-Follow instructions from authorities-Call 256-824-6911 if you need help-All others avoid area

5. **All Clear Scenario:**
   - **All Clear**
     This is an all clear notification-The emergency has ended-for more information visit www.uah.edu

6. **Tornado Warning Scenario:**
   - **Tornado Warning**
     A tornado warning has been issued for the area of the UAH campus-Seek shelter immediately

7. **All Clear Weather Scenario:**

---

UAlert is an emergency notification system that allows the University to quickly disseminate an urgent message through multiple communication channels including:

- Voice messages to cell, home and office phones
- Text messages to cell phones
- Email messages

All enrolled students, faculty and staff will be automatically enrolled in UAlert. If you wish to opt-out of the emergency notification system, please check the box below.

☐ Opt Out of the UAlert Emergency Notification System

---

Disclaimer

I understand that I have chosen to opt-out of the UAlert Emergency Notification System that is used to disseminate an urgent message when an emergency occurs at the University. Furthermore, I understand by opting out of UAlert, an emergency notification will only be sent to my official UAHuntsville email address.

Should I choose at a later date to participate in UAlert, I understand that I may update my preferences by using the UAlert web portal at http://ualert.uah.edu.
