CUMMINGS RESEARCH PARK
HUNTSVILLE, ALABAMA

Established in 1962, Cummings Research Park (CRP) is one of the largest and most-respected research parks in the world. Since its inception CRP has grown to become the second-largest science and technology park in the U.S. and fourth-largest in the world.

CRP, as shown here, encompasses 3,843 acres and includes more than 12 million square feet of administration, laboratory, research and development, classroom and manufacturing space.

Approx. 450 acres of land are available for development in CRP West, and with the primary goal of stimulating economic development growth and investment, the price of land per acre in CRP is significantly lower than adjacent property, and a leading incentive for new and expanding companies.

Land parcels in CRP West range from five acres (minimum) to 18 acres, but may also be reconfigured to meet company requirements. For each parcel, the City of Huntsville will complete basic site preparation including road access, curbing, drainage, telecommunications, and utilities to the site.

For more information contact John Southerland at 256.535.2066 or johns@land.com

Some Policy/Procedure Issues Regarding Enrollment/Retention

- Web site and web-based processes
- Outdated information
- AP credit
- GER/curriculum hours
- Lack of uniformity of transfer credit acceptance
- Affordability
- Block tuition
- Lack of culture of customer service
