

**Senate Candidates from the College of Engineering
(8 seats available)**

<i>Name</i>	<i>Classification</i>	<i>Personal Statement</i>
Brittany Bailey	Sophomore	My interest in serving as a Student Government Association Senator for UAH comes from a desire to represent not only the College of Engineering, but also the student body as a whole, in order to ensure that necessary improvements are being made on campus and that students' needs are being heard and the appropriate resolutions are being written. I am excited about our First Council program that was founded this past year through SGA, and I am looking forward to the prospect of continuing to guide these members and work closely with them as they become leaders that will be prepared to make a positive impact on our campus, as well as in their own futures.
Brittany Black	Junior	I have served as a senator in the past, but had to drop my position due to my class schedule. I now hope to return with strengthened leadership abilities and I strive to exercise these abilities against the given leadership opportunities presented to me. I am interested in serving as a senator because I want to grow as a student and as a leader on and off campus. My main goal for the term would be to listen to the complaints of the students

Victoria Eccles	Junior	<p>around me and ask questions concerning these concerns. My occupation as a senator would be to question these concerns and to address any issues that my fellow students may be experiencing. I strive to strength the bonds between the college and the students, and to grow this campus into the university it was meant to be.</p> <p>I want to be a part of the student government so that I can be a part of my schools system for improvement. I want to make an impact during my time at UAH and try to help make a difference any way I can. Standing on the sidelines won't be enough to make a change but getting involved can. I know I have the drive and commitment to excellence needed to work as a team. By listening to the student body we can help make changes to benefit each of our futures. My ultimate goals in working with SGA would be to work on projects that would make a lasting impact on the students of UAH now and into the future. As well as to listen to students opinions and try to have their voices heard, even when they are unable to be present.</p>
Craig Hunt	Junior	<p>My name is Craig Hunt and I am applying to be a senator for the College of Engineering as well as to give the veteran population on campus a voice in our student government. I currently am on the board of Sigma Alpha Pi and I am involved with the UAH Veterans Network. If elected, my goal will be to help my fellow students and veterans discover and adapt to the resources currently available and create new opportunities, thus working towards a successful experience for all at UAH. Lead with Integrity.</p>
Jacob Jones	Sophomore	<p>I'm interested in SGA as an organization because they have the most direct impact on students. The decisions made within SGA matter, and that is a huge draw for me because I really want to help and get involved in something that matters. In terms of goals for SGA, I want to serve to</p>

Evan Mitchell	Junior	the best of my ability. Whatever that entails. Mostly I desire to make positive contributions to the students of UAH. I am interested in SGA because I have multiple friends that are currently in the Senate. The things I have heard them talk about seem like things that I would be interested in helping this campus accomplish. I attend a good number of campus events and would like to be more involved on campus. This would give me a chance to share the things I hear from other students around campus.
Taylor Reed	Junior	My name is Taylor Reed and I am running for an engineering senate seat. I have been involved with SGA for three years now and have striven to make the best for students. While representing students all across campus I have made student concerns be heard in many areas. I have served on the food service committee to make the dining options better for students, I have served on the Charger Cycle team to bring that program to campus and have been the longest serving student member on the Charger Union design team By students voicing their concerns many things can be, and have been accomplished and changed on this campus. It is my goal to continue to serve all of the students of this campus and I will work to make everyone's voice be heard. With your vote, I will listen, and I will act!
Brandon Straight	Junior	I have been an SGA College of Engineering Senator for the last two years and have helped pass many resolutions to better the community. I would like to continue serving on SGA to continue working on active projects to better the UAH community. For my term in office, I would like to make sure all the students' voices are heard, and I would like to help the Student Organizations to get more funding to help better campus life and the community we live in.
