

THE STUDENT EXPERIENCE

UAHuntsville
THE UNIVERSITY OF ALABAMA IN HUNTSVILLE

Every UAHuntsville student is expected to be actively engaged in his or her collegiate experience. This engagement extends beyond the classroom to include co-curricular and extra-curricular activities. There are four vital components or pillars to the UAHuntsville experience.

Pillar 1: Student Involvement

Every student will participate as an actively engaged member of the campus community through student involvement experiences. These experiences can include student organization membership, attending campus events, joining Student Government, participating in community service, etc. Students will be able to record their student involvement experiences through the co-curricular transcript.

Pillar 2: Classroom Learning Application

Students will have opportunities to engage in experiences where what they are learning in the classroom can be applied to real-world work experiences. UAHuntsville provides students with limitless opportunities for on-campus employment, internships and co-ops along with chances to work with faculty members doing research.

Pillar 3: Global Experiences

UAHuntsville is a global university. Our students come from all over the world to study here and we want our students to understand their obligation for global citizenship. Students will have opportunities to study abroad, attend campus events that focus on global literacy, and interact with other students from around the world.

Pillar 4: Culminating Experience

Every UAHuntsville student will be prepared upon graduation to enter the workforce or pursue graduate studies. Through intensive leadership development opportunities, workshops, and career development, our students will be ready to move forward with whatever adventures lie ahead of them.
