CPE 649: ADVANCED INFORMATION ASSURANCE ENGINEERING Spring 2011, Tuesday/Thursday, 5:30-6:50, EB 134

Dr. Reza Adhami (256-824-6316) Email: <u>adhami@eb.uah.edu</u> Office Hours: Available by appointment

Paul DePriest (256-327-6535) Email: pwd0001@uah.edu Office Hours: Available by appointment

**Synopsis:** Information assurance (IA) Engineering is about developing systems to remain dependable in the face of malice, error, and mischance. As a discipline, IA focuses on tools, processes, and methods needed to design, implement, and test systems and to adapt existing systems to survive in a hostile environment.

Advanced Information Assurance Engineering will cover topics ranging from how to attack computer systems and networks to how to protect and recover from attacks on computer systems and networks. The student will learn the basic process utilized by computer attackers in order to develop a complete understanding and appreciation of the threat to information assurance. In addition, we will cover the process of detecting, preventing, and recovering from information assurance attacks. This will include the details of Intrusion Detection and Prevention Systems, auditing, Security Vulnerability Assessments, and the Incident Response process.

| Grading: | Written Test  | 10%<br>20% |  |  |
|----------|---|------------|--|--|
| -        | Practical Exercise – Final Exam   |            |  |  |
|          | Labs  | 32%        |  |  |
|          | Project   | 20%        |  |  |
|          | Homework/Class Participation  | 18%        |  |  |
| Books:   | Counter Hack Reloaded, by Ed Skoudis (ISBN: 0-13-148104-5)                        |            |  |  |
|          | The Tao of Network Security Monitoring, by Richard Bejtlich (ISBN: 0-321-24677-2) |            |  |  |
|          | Network Security Assessment, by Chris McNab (ISBN: 0-596-51030-6)                 |            |  |  |

## Schedule:

| Session # | Date       | Lecture/Lab/<br>Test | Topic(s)                               |
|-----------|------------|----------------------|--|
| 1         | 01/11/2011 | Lecture-01           | Unix/Linux overview, Windows Overview, |
|           |            |                      | Networking Overview                    |
| 2         | 01/13/2011 | Lecture-02           | Attacking Networks: Reconnaissance,    |
|           |            |                      | Scanning, Gaining Access               |

| 3  | 01/18/2011 | Lab-01     | Information Gathering Tools and Techniques |
|----|------------|------------|--|
| 4  | 01/20/2011 | Lab-02     | Port and Vulnerability scanners            |
| 5  | 01/25/2011 | Lab-03     | Exploiting Systems and Networks Part I     |
| 6  | 01/27/2011 | Lab-04     | Exploiting Systems and Networks Part II    |
| 7  | 02/01/2011 | Lecture-03 | Attacking Networks: Maintaining Access,    |
|    |            |            | Covering Tracks                            |
| 8  | 02/03/2011 | Lab-05     | Trojan Horses and Rootkits Part I          |
| 9  | 02/08/2011 | Lab-06     | Trojan Horses and Rootkits Part II         |
| 10 | 02/10/2011 | Lab-07     | TCP Session Hijacking                      |
| 11 | 02/15/2011 | Lecture-04 | Network Security Monitoring                |
| 12 | 02/17/2011 | Lecture-05 | Student Presentation – Homework 2          |
| 13 | 02/22/2011 | Lab-08     | Network and host Intrusion Detection       |
|    |            |            | Systems                                    |
| 14 | 02/24/2011 | Lecture-06 | How to secure a Windows system             |
| 15 | 03/01/2011 | Lab-09     | Securing Microsoft windows part I          |
| 16 | 03/03/2011 | Lab-10     | Securing Microsoft windows part II         |
| 17 | 03/08/2011 | Lecture-07 | How to Secure Unix/Linux systems           |
| 18 | 03/10/2011 | Lab-11     | Securing Linux Part I                      |
| 19 | 03/15/2011 | Lab-12     | Securing Linux Part II                     |
| 20 | 03/17/2011 | Lecture-08 | Network Security Assessment: Tools, Host   |
|    |            |            | and network enumeration, network scanning  |
| 21 | 03/29/2011 | Lecture-09 | Network Security Assessment                |
| 22 | 03/31/2011 | Lecture-10 | Student Presentation – Homework 3          |
| 23 | 04/07/2011 | Lab-13     | Perform a system audit part I              |
| 24 | 04/12/2011 | Lab-14     | Perform a system audit part II             |
| 25 | 04/14/2011 | Lab-15/16  | Prepare for Digital Combat Exercise        |
| 26 | 04/19/2011 | Lecture-11 | Project Presentations                      |
| 27 | 04/21/2011 | Lecture-12 | Project Presentations                      |
| 28 | 04/26/2011 | Test       | Written final – covers whole class         |
|    | 05/03/2011 | Practical  | Digital Combat Exercise 18:30-21:00        |
|    |            | exercise   |  |

- Exams: Exams will be open book / notes. Don't miss exams without prior permission. If you do miss an exam with permission, we will decide on a makeup day at that time.
- Labs: Labs are a very important part of this class. A pre-lab assignment will be given for each lab session. If this assignment is not completed before the lab, you will not be permitted to participate that session. If you must miss a lab session, please notify us in advance and we will attempt to provide a makeup time. A zero will be given for each lab not completed.
- Project: Each student will complete a project. These projects are discussed in a separate handout.

- Homework: Selected homework assignments will be graded. This will primarily consist of short papers that will be written on various subjects throughout the semester.
- Attendance: Although you will not be graded on attendance, remember that class participation does count toward a small part of your grade.

**Disability Statement:** 

The University of Alabama in Huntsville will make reasonable accommodations for students with documented disabilities. If you need support or assistance because of a disability, you may be eligible for academic accommodations. Students should identify themselves to the Disability Support Office (824-6203, UC113) and their instructor as soon as possible to coordinate accommodations.
