

Global Studies Cognate Thematic Concentrations

Students select one concentration from those available below. These concentrations are designed to enhance students' core coursework in Global Studies and a foreign language by providing them opportunities to study a particular aspect of global studies from multiple disciplinary perspectives.

In consultation with the Global Studies Program director, students will select four courses selected from course offerings in each concentration. Courses must come from three different disciplines unless the Global Studies adviser approves an exception. For each area, courses not listed here such as special topics may be substituted with the approval of the Global Studies adviser.

For all concentrations, students are strongly encouraged to participate in a study abroad program that enhances their engagement with the topics and issues of their concentration and/or that provides them an intensive foreign language learning experience.

- Global Markets and Politics.** This concentration helps students examine the global dimensions of business, finance, and manufacturing and their impact on daily life and on local, national, and international politics. Students are also encouraged to consider alternative practices for enabling more socially equitable market outcomes and sustainable development.

Two courses must come from this list:	Two courses must come from this list:
MKT 301 Principles of Marketing MGT 450 International Business ECN 454 International Economics and Finance FIN 301 Principles of Financing FIN 454 International Finance	HY 373 Foreign Relations of the US to 1920 HY 374 Foreign Relations of the US since 1920 PSC 440 Regional Studies SOC 369 Environmental Sociology SOC 415 Sociology of Globalization SOC 480 Sociology of Science and Technology

Other courses, with approval of Global Studies Program director, may be substituted for these courses.

- Global Environment, Technology, and Health.** This concentration enables students to explore the environmental opportunities, challenges, and threats arising from the growing demands on resources, the challenges posed to public health from globalization, and the increasing global interconnectivity of peoples. Students are encouraged to consider ways in which these interconnections can best be utilized to promote growth, protect the environment, and create better policies and mechanisms for improving public health.

At least one, but no more than two courses from the following courses are required:	Remaining courses to be chosen from these courses:
ESS 111 Climate and Global Change ESS 210 Collapse of Civilizations	HST 369 US Environmental History HST 370 US History of Technology
