# DL Mediasite Updates—Mobile & Webcasting

## *WHERE WE ARE GOING IN DL*

### ***COMING SOON: MEDIASITE GOES MOBILE WITH VERSION 6***

Coming Spring/Summer 2012, Distance Learning will be upgrading our software to the newest release from **Mediasite**, the lecture capture system used to record and make classes available on-demand or via webcasting. Mediasite 6 includes a large number of viewer enhancements, including the long-awaited jump across platforms to Mac's. Here are some updates you can expect to see in your access to lecture content:

- More portability with access on iPad, iPhone, Blackberry, and Android
- Keyword searching in slide text and presentation metadata (titles, descriptions, presenters, etc.)
- Support for HD resolution up to 720p
- And more...

### ***Webcasting Options Now Available with Mediasite***

Do you want to watch your class LIVE, while it is being filmed? Do you want to submit questions to the professor during the class? Then **webcasting** is for you.

**Mediasite** allows viewers to watch content on-demand (asynchronously) and also via **Webcasting** (which is also called live streaming). Webcasting events allow viewers to see and hear the presenter while the event is being recorded, along with seeing any content being presented (i.e., PowerPoint slides) as time-synched pictures alongside the presentation, just as though you were watching asynchronously. Webcasting events may be configured to allow viewers to also see and respond to live polls, submit questions via a Q & A tool, and also view linked documents that are being shown live in class along with the rest of the class. Q & A functionality is typically managed by an on-site moderator during the event.

See the [Live Stream Interaction Options](#) handout for more information on these options. If you are interested in seeing your class live, contact your professor to request this option. (Please note that you may also view polls that have been completed, view linked documents, and submit questions when viewing videos on-demand/asynchronously, provided that these tools are enabled in your event). You may also find it useful to review our [Mediasite Student Helpsheet](#) if you need further assistance with accessing your course videos through Mediasite.

# DL Registration & Course Procedures

## Registration Procedures

- Complete DL [registration form](#) *in full* each term.
- Use your A# (UAH ID number), *not SSN*.
- Remember to use your UAH email address.
- Signatures at bottom of form are required.
- Late charges apply for all late registrations or late payments.
- If your company covers tuition, all information concerning billing must be included with registration to Bursar.
- Students are responsible for obtaining required textbooks; you may do so at the UAHuntsville bookstore at: <http://www.uah.bncollege.com>

Tuition rates, including any applicable course fees, are available on our website:

<http://www.engdl.uah.edu/tuition.php>

## Distance Learning Procedures

- The **DL lecture capture** is typically posted within one hour after the scheduled class time. If there is a delay in posting, this is due to post-production needs for the class. ***Allow 24 hours*** M-F prior to notification of the DL office of no posting for your class.
- All videos captured by DL **will be offered via Internet access ONLY** through our Mediasite web server:  
  
<http://uahengdl.uah.edu/mediasite/Catalog>
- **Assignments** should be submitted to your instructor via email, Angel, or other designated delivery method noted by faculty member. Graded assignments will be returned via Angel, email to DL student's UAH Google Apps email address, local student mailbox, or classbox (located in room TH N154). Please refer to your class syllabus for procedures for assignment submission and retrieval in each course.
- **Exams** are proctored from the DL office for local students by appointment only. These should be scheduled through Ms. Luke and are held every weekday starting at 9:30 am or 1:30 pm. Remote DL student exams must go through a designated proctor. Students are responsible for identifying the proper proctor at their location and submitting the proctor's name and contact information to Ms. Luke. She may be reached at (256) 824-6976, and at [luke@eng.uah.edu](mailto:luke@eng.uah.edu). DL contacts and certifies proc-

### PLEASE NOTE:

## DISTANCE LEARNING MISSION STATEMENT

**Our mission is to offer our students high quality distance learning courses and programs in engineering, computer science, business, and related academic fields via state-of-the-art technology.**

**We're going where you're going—where do YOU want to go with your education?**

Please tell us how we are doing—complete the **DL Student Survey** at the link below:

## DL FACULTY/PROGRAM SPOTLIGHT

This issue we are highlighting the new I/O concentration offered through the Psychology Department at UAH. Both courses offered through DL are described below, and are cross-listed with the ISE department's course offerings. Both classes are designed to allow DL students to fully participate throughout the class with a number of interactive assignments aimed at real-world applications. See more detailed information on each class below, and register early as spots may fill quickly.

Dr. Sandra Carpenter and  
Dr. Marita O'Brien from the  
Psychology Department at  
UAHuntsville Offer 2  
Classes for New M.A.  
Specialization in Industrial/  
Organization Psychology

### **PY 503/ISE 503: Human Factors Psychology—Dr. O'Brien**

**What: Offered Spring 2012.** This course is designed to introduce students to the field of Human Factors. The science of Human Factors is the application of basic psychological knowledge towards making products and systems safer and easier to use. Students will also gain an understanding of *what can happen when human capabilities and limitations are not considered in the design of things that people use, especially when serious accidents result* from improper design of processes and products.

**How:** All students have to deliver a team presentation based on group analysis and redesign of a chosen user interface. This project allows students to develop their experience collaborating with engineers and psychologists of different backgrounds by practicing the techniques taught in class. DL students have developed their presentation and technical report through conference calls, chat sessions, and Google groups, allowing students to also hone their skills in managing projects remotely.

In relation to teaching this particular class through DL, Dr. O'Brien notes, "I have enjoyed teaching this class to working students, especially those learning via distance, to share knowledge about the application of human factors in a variety of domains. In the two years I have taught this class, I have seen how fighter planes, Navy divers, and touch screens are created to fit the target users' capabilities and limitations. This access would not be possible except through DL where my lessons can be followed by students in their work environments".

### **PY/ISE 520: Industrial and Organizational Psychology—Dr. Carpenter**

**What: Offered Fall 2011.** This course is an advanced study in the application of basic principles of learning, motivation, and perception to typical industrial and organizational problems. The primary goal of the course is impart to students a scientifically informed method for studying, measuring, and intervening into the growth and development of human organizations. *Practical information from this course can be applied directly in the workplace, such as training, job analysis, and employee selection and evaluation.*
