

Chemical Donation Fact Sheet

Has one of your former students or clients offered to donate chemicals from their current employer?

STOP!

Be sure and complete the University Donations Process even if they do not want a tax deduction.

Chemical Donations must be reviewed by OEHS just like Chemical purchases. If you complete the University Donation process through University Advancement, they will route the request through UAH so that you can get the appropriate guidance and approvals.

Sometimes “free” chemicals have a high disposal cost. The donating company may not even be aware of this – they mean you only good, but it ends up costing you in the end.
