John Doe
Hiring Manager
Globodyne, Inc.
123 Global Drive
Huntsville, AL 35899

Dear Mr. Doe:

It is with great enthusiasm that I submit my application for the process engineer position at Globodyne, Inc. As a recent UAH graduate, I am thrilled by the opportunity to utilize my engineering education and unique skillset gained in and out of the classroom. I believe you will find that my excellent communication skills, technical savvy and true passion for Globodyne's mission will make me a perfect fit for your team.

During my time as an intern with Hidway-Martin as a process engineering intern, I not only learned firsthand the processes of conducting yield audits and analyzing production efficiency, but I also impacted efficiency for the better. Along with my team of seasoned professionals, we ultimately identified one prominent, yet previously undiscovered, source of process waste. This discovery, along with further analysis and reworking of our unit's system resulted in \$12 million in savings for Hidway-Martin during the last fiscal year. I would be delighted to use these collaboration skills and keen attention to detail to create a lasting impact for Globodyne.

I hope this letter provides you with deeper insight into my professional skills and genuine interest in this position, and I look forward to the opportunity to speak with you further regarding my qualifications. Thank you for your time and consideration.

Sincerely,

Charger Blue
