

How to set up

GRUBHUB™

for Campus

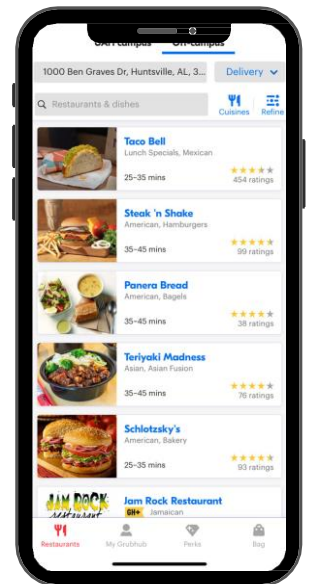

Step 1:

Go to your app store and search "*Grubhub*" and download the app.

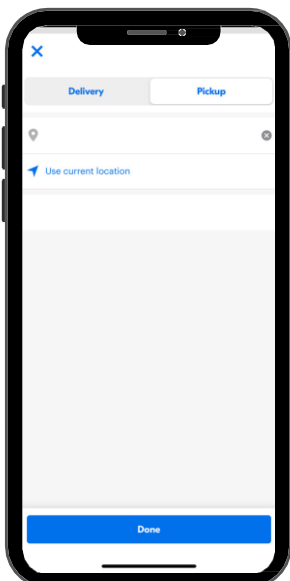

Step 2:

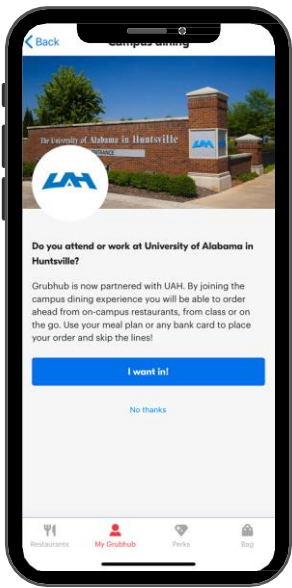

Once the app is downloaded and you open it, you should see the screen to the right. Then you'll select the location bar at the top.

Step 3:

Select the "*pickup*" tab at the top. Then you'll want to select "*Use current location*" if you're on campus and allow Grubhub to access your location "*while using the app*" or "*allow once*". If you are off campus trying to set up, type in a campus address.

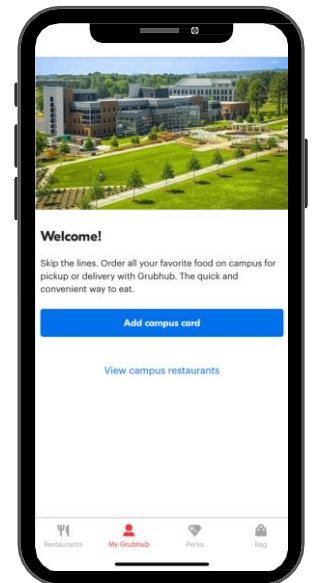

Step 4:

Once the app recognizes your location is on or near campus, this page will pop up and you'll want to select "*I want in!*"

Step 5:

The app will then ask you a few questions about your status relative to the University.

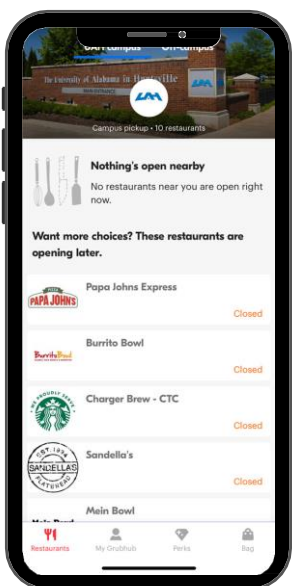

The app will then ask you if you want to add a campus card. When you click "*Add campus card*" it will bring up the UAH Charger ID and password login to connect your Charger Card.

Step 6:

After adding your Charger Card, you should see all our locations.

Note: At the top it allows you to switch back and forth between on and off campus restaurants.

*Grubhub is only available for pickup on campus at this time.
