

**FY 2006-2007
Unified Budget
Recommendation**

Alabama Commission
on Higher Education

"..... The Commission shall receive, evaluate and coordinate budget requests for the public institutions of higher education of this State, shall hold open hearings on the budget requests of the separate institutions and shall present to each institution and to the Governor and the Legislature, a single unified budget report containing budget recommendations for separate appropriations to each of the institutions. The consolidated budget and analysis of the Commission shall be accompanied by the original requests and their justifications as submitted by each institution. The recommendations of the commission shall be derived directly from its assessment of the actual funding needs of each of the universities, as presented to it by the presidents, which assessment may include, but shall not be limited to, derived conclusions that may be based upon standard techniques of objective measurement, need and unit cost figures arrived at through the use of comparative and verified data secured from the various institutions, applied in an impartial and objective manner, and comparison shall be made not only between similar functions of institutions in Alabama but also between Alabama institutions and similar functions of institutions located in other states, provided that nothing herein shall be construed to prohibit any institutions of higher education in this state from submitting any matter pertaining to the financial operation and needs of said institution to the legislature or to the governor at any time....."

Notes:

- 1) Based on calculations made by the AL Comm. on Higher Education using increase in FY 2006 rate (8.17) to FY 2006 rate (9.36%) or as supplied by the institution. Rates may change due to legislative action.
- 2) Retirees from the August 2005 count have been increased 1.5% for FY 2006-2007. FY 2006-2007 rate based on an increase of approximately 12%. This estimate has been calculated by the Alabama Commission on Higher Education or has been supplied by the institution and has not been verified by PEEHIP and is subject to legislative action. The increase has been calculated using the FY 2005-2006 amount estimated supplied by the institutions.
- 3) Funds for Athens State University and Jacksonville State University are to cover the cost of the PEEHIP rate increase.
- 4) Additional FY 05-06 allocation of \$2,201,555 for this line is included in the line for the Alabama Agricultural Land Grant Alliance (AALGA). The total amount allocated for FY 2005-2006 was \$3,056,976. An additional \$646,164 will be recommended for FY 06-07 in the AALGA allocation. The total amount recommended for FY 2006-2007 is \$3,703,140.
- 5) Amount for Alabama A&M Extension is based on inflation as of the end of September (4.7%).

SECTION C

FUNDING FORMULAS AND UNIFIED BUDGET RECOMMENDATION PROCESS

This section describes the various funding formulas used by the Alabama Commission on Higher Education in arriving at a statement of the level of funding required to achieve the appropriate ACHE Standard for the institutional elements of the higher education budget and the processes used in the construction of the ACHE Standard for Alabama higher education funding.

Overview of ACHE Standard Formula

Formula Components:

(1) Academic Program Calculation (Senior Institutions)

Cost of Instruction and departmental operating expenses

Multiplier

- a) Unit instructional Cost (For general studies-average regional faculty salaries divided by assumed productivity adjusted for inflation)
- b) Departmental Operating Expenses (overhead and administration)

The multiplier times weighted Semester Credit Hours (Academic weights to reflect cost differences in program mix and instruction level) equals total cost of instruction

Academic Support (5% of estimated cost of instruction and operating expenses)

Research (2% of sum of estimated cost of instruction, operating expenses & academic support)

Sponsored Research (5% of qualifying research)

Public Service (2% of sum of estimated cost of instruction, operating expenses & academic support)

Library Support (Actual unweighted semester hours, less military science, times cost factor)

General Administration & Student Services (set amounts based on headcount enrollment)

Physical Plant & Custodial Services (gross square feet multiplied by cost factor)

General Institutional Support (14% of items above)

Utilities O&M Allowance (calculations are based on consumption rates for heating, electricity, and other utilities and gross square educational and general floor area)

Less—Tuition adjustment (90% of weighted average credit hour charge multiplied by 3-year average unweighted credit hours—court ordered exceptions include ASU and AAMU)

Utilities Capital Allowance (5-yr amortized expenditures for major repairs and replacement)

1st Professional Health (medicine, optometry, dentistry, veterinary medicine, pharmacy & teaching hospitals)

(2) Other Components of ACHE Standard Calculations (Senior Institutions):

Agricultural Experimentation and Extension (Auburn University-prior year ACHE standard calculation times 3%)

Organized Research (8% of Academic Program Research Component for doctoral institutions and 4% for non-doctoral institutions)

Public Service (8% of Academic Program Public Service Component)

Facilities renewal and replacement (based on volume of physical space, its construction and age, use and nationally estimated engineering rates for renovation and replacement)

Fringe Benefits (Social Security (FICA), Retirement (TRSA) and PEEHIP (Health Insurance of prior year actual expenditures—Two-Year colleges)

Title VI Knight v. State of Alabama Court ordered funding (Desegregation)

(3) Two Year College ACHE Standard Calculations: (plus facilities renewal and fringes)

Community College - median SREB appropriation per FTE times 3-Yr Average Fall FTE

Technical College - Adjusted Expense Rate times 3-Yr Average Fall FTE

Adjusted expense rate is based on average faculty salaries, student/faculty ratio, program support expense adjustment and tuition adjustment

EXPLANATION OF ACHE FUNDING PROCESS FOR HIGHER EDUCATION

The Alabama Commission on Higher Education's recommendations for the funding of Postsecondary education are based on several types of assessment:

- A set of formulas, which relate funding needs for the academic programs of the senior and junior institutions to student credit hours, faculty productivity, and faculty salaries.
- Facilities Renewal Allowance is an estimation of the amount of money needed to provide for the aging of all building elements in a given year.
- Updated values for ongoing research and service activities and for other instructional activities which are not susceptible to "formula" determination, derived from earlier funding levels.
- Analysis of funding needs for new programs and major changes in existing programs based on estimated expenditures and revenues.

Academic Program Formula - Universities

The calculation of the Academic Program multiplier is predicated in the estimated National Association of State Universities and Land-Grant Colleges (NASUGLC) regional General Studies average salary for doctoral and regional institutions. A multiplier is determined from regional faculty salaries adjusted by an estimated departmental expense rate. The multiplier uses an assumed faculty productivity factor of 630 student credit hours (SCH) annually for doctoral institutions and 585 SCH for nondoctoral institutions. These productivity factors imply a General Studies faculty: student ratio of 1:26 for doctoral institutions and 1:24 for regional institutions.

The computations for FY 2006-2007, for the senior institutions, are shown on page C-7.

The amounts calculated above are distributed to institutions according to a formula consisting of the sum of the following elements:

- (a) Weighting Factors
- (b) Other Cost Factors.

Notes:

- A. Multiplier equals Region IV inflation-adjusted salary divided by productivity of 630 semester credit hours, plus 20% of salary cost added for Departmental Operating Expense. Multipliers are based on salaries two-years prior to formula year, adjusted for inflation.
- B. Multiplier applied to nondoctoral is weighted by the average ratio of CUPA to NASULGC national salaries times the ratio of doctoral productivity (630 SCH) to nondoctoral productivity (585 SCH).

Source: 2004-2005 National Faculty Salary Survey by Discipline and Rank in Four-Year Colleges and Universities, College and University Professional Association for Human Resources and 2004-2005 Faculty Salary Survey by Discipline, Office Institutional Research, Information Technology Division, Oklahoma State University.

Senior Institutions

1. Instruction: The three-year average of actual on-campus weighted semester credit hours for 2002-2003, 2003-2004, and 2004-2005 is applied to the instructional multiplier. The instructional multiplier is 132.41. Remedial credit hours receive an additional 115% increment.
2. Academic Support: 5% of the amount generated for instruction.
3. Research: 2% of combined amounts for instruction and academic support plus 5% of 2002-2003 sponsored research.
4. Public Service: 2% of combined amounts for instruction and academic support.
5. Library Support: Actual on-campus unweighted semester credit hours (except military science) corresponding to the weighted credit hour value multiplied by the following cost factors:

Undergraduate	\$10.64
Graduate I (Masters)	21.38
Graduate II (Doctoral)	91.55
Law	56.47

6. General Administration and Student Services (GA/SS): For institutions with total approved campus headcount enrollment of less than 4,000:

1 to 2,000 Headcount	\$1,307.30
2,001 to 2,999 Headcount	688.21
3,000 to 3,999 Headcount	309.50

For institutions with total approved headcount enrollment of 4,000 or greater:

First 4,000 Headcount	\$539.32
4,001 to 8,000 Headcount	403.91
Over 8,000 Headcount	363.29

The GA/SS amount is computed based on total approved headcount, then distributed proportionately among the GA/SS components of the formula funded lines of the institution.

Example: Total Approved Headcount	4,000
Main-Campus Headcount	3,800
Approved Branch Campus Headcount	200

Total GA/SS = $4,000 \times 539.32 = \$2,157,280$.

Main-Campus: $\frac{3,800}{4,000} \times 2,157,280 = \$2,049,416$

Approved Branch Campus $\frac{200}{4,000} \times 2,157,280 = \$107,864$

7. Maintenance of Physical Plant and Custodial Services: Gross square feet (GSF) as of June 30, 2005, multiplied by \$5.45.

8. General Institutional support: 14% of total amount generated in items 1-7.

9. Utilities: This calculation is a combination of two different calculations. The first calculation uses the highest annual consumption rate per gross square foot of E & G floor area for the last three years (July-June, 2002-03, 2003-04, and 2004-05) for heat energy and electrical energy multiplied by projected rates per energy units for 2005-06. The "other" utilities input (water, sewage, and solid waste disposal) is calculated by multiplying the actual rate of consumption per gross square foot of E & G floor area for 2004-05 by a projected rate per energy unit for 2005-06. The projected escalation factors for heating fuel, electricity and other utilities are the same as the inflation factors that were used throughout the calculation of the Ache Standard (1.033 and 1.036). The second set of calculations are made using a statewide standard, which is based on the average annual consumption rates for heating, electricity, and for other utilities combined. The standard consumption rates are then applied to the projected rates of costs for each institution. The gross E & G floor area as of June 30, 2005 is then multiplied against the higher of these two calculations.

10. Tuition Adjustment: A weighted average credit hour charge was calculated, using 2005-06 tuition and required fees and three-year average unweighted credit hours. Ninety percent (90%) of that rate multiplied by the three-year average of unweighted credit hours (excluding Military Science) is the tuition deduction for all institutions except Alabama A&M University and Alabama State University. For those institutions, ninety percent (90%) of their actual weighted credit hour charge is used for the tuition deduction.

For the 2006-2007 formula, the weighted per-credit-hour tuition deductions are:

General	\$146.06
Alabama A&M University	140.96
Alabama State University	124.87

Additional Components added after the Academic Program Formula calculation in order to determine the ACHE Standard

The Academic Program Formula provides only a portion of the funds needed to carry out the assignments of Alabama public colleges and universities. Additional components of funding are added to the Academic Program Formula to cover these needs.

These needs include organized research and public service (the historic “line item” activities), facilities renewal, and funds to cover Social Security and Retirement and additional funds for health insurance for the two-year institutions.

Organized Research and Public Service

Doctoral institutions receive an additional eight percent (8.0%) and nondoctoral institutions receive four percent (4.0%) of the amount they received from the academic program formula for Research. All four-year institutions receive eight percent (8.0%) of instructional costs for Public Service.

Facilities Renewal Allowance

The Facilities Renewal Allowance is calculated from a detailed formula based on the volume of physical space, construction, age and use (office, classroom, lab, etc.). Nationally estimated engineering rates for renovation and replacement are used to determine the costs factors. (Page C-16)

Fringe Benefits

Social Security (or FICA), and Retirement (TRSA), and PEEHIP (Health Insurance), are included at the reported actual expenditures of the previous year.

All of these needs, in composite, are referred to as the ACHE Standard.

Community College Funding Needs
Alabama Public Institutions
Fiscal Year 2006-2007

The funding rate per FTE student of the Southern Regional Education Board (SREB) states is calculated. The rate is multiplied by the Alabama Community College three-year average Fall FTE enrollment to produce a total which approximates the amount funded at the average of the SREB states.

STATE	APPROPRIATIONS	FTE ENROLLMENT

Technical Colleges Funding Needs
Alabama Public Institutions
Fiscal Year 2006-2007

Total funding needs for the Alabama technical colleges are estimated by calculating the average salary (9 months) for technical college faculty, applying a standard student: faculty ratio (15:1) to determine instructional salary expense per student FTE, and multiplying this rate by the three-year average Fall FTE enrollment.

AVERAGE FACULTY SALARY 2004-2005	42,017
INFLATION FACTOR 1.0702	44,966
PROJECTED INSTR'L EXP/FTE	2,998
PROJECTED TOTAL EXP (DIVIDE BY .6)	4,996
TUITION ADJUSTMENT	(2,430)
ADJUSTED EXP PER FULL-TIME STUDENT	2,566

* Note: Recommended funding calculations based on \$3,328 per FTE for Junior/Community Colleges and \$2,566 per FTE for Technical Colleges, as calculated from SREB Data Exchange, 2004-05 (preliminary data).

Facilities Renewal Requirements

Basis of Estimates:

In its Unified Budget Recommendations for the last several budget years, the Alabama Commission on Higher Education included funding, to be provided from nonrecurring revenues, for the renewal of facilities. The amount recommended for each institution is an estimate of the amount of money needed to provide for the aging of all building elements in a given year.

The method used by the Commission staff to estimate facilities renewal needs is not as precise as a carefully prepared engineering estimate based on detailed facilities inspections. However, until each institution has thoroughly documented its entire requirement for repair and renovation, a detailed engineering estimate cannot be prepared and the process followed by the staff provides a consistent and realistic estimate of needs.

The rationale behind the process is as follows:

- (1) The incidence of major repair and the need for general renovation of a building increase with its age, and the relationship is generally skewed toward the older, unrenovated facilities.
- (2) Different elements of a building wear out or become obsolete at different ages. For example, foundations and principal elements of the superstructure are essentially permanent. Exterior walls, plumbing, and lighting have expected life of 40 to 50 years. Roofs and air conditioning should last 20 to 25 years. Interior surfaces require reworking in 10 years or less.
- (3) Different types of buildings, even though constructed to similar standards of quality and of similar materials, are comprised of different combinations ("mixes") of elements, and the cost of replacing or renovating each type depends on the mix and the cost per square foot of each element.
- (4) The "renewal allowance" of a building is defined as the amount that should be budgeted in any year to provide for the aging of all elements of that building. The "renewal backlog" of a building is defined as the summation of all the years' renewal allowances to date, for that building, from its initial completion (or latest complete renovation) and is a measure of the total amount that should be spent to bring the building to essentially new condition. The renewal allowances and backlogs are estimated by multiplying the sums of maximum renewal costs for each 25-year and 50-year element by factors reflecting the age of the building elements.

Attachment 1 summarizes maximum renewal costs, at 2004 construction cost levels, for 50-year and 25-year elements, for different types of college and university buildings, derived from the 2005 Means Square Foot Costs. These construction costs were then adjusted using a regional cost factor of .80. Elements normally requiring reworking or replacement in less than 20 to 25 years (e.g. wall finishes) are not included in renewal costs, on the basis that these elements are dealt with in the course of regular maintenance.

Procedure for Calculating Renewal Allowances and Backlogs

Renewal Allowances and Renewal Backlogs are calculated as follows:

(1) Calculate the current replacement value of each 50-year and 25-year element of each major campus building according to Attachment 1 and determine the Maximum Renewal Allowance for each facility as follows:

(a) 50-year Elements: Maximum Renewal Allowance is the sum of the current replacement costs of 50-year elements.

(b) 25-year Elements: Maximum Renewal Allowance is the sum of the current replacement costs of the 25-year elements.

(2) Calculate the "adjusted age" of the 50-year and 25-year elements for each building that has undergone renovation since its construction (up to 50 and 25 years respectively), as follows:

(a) 50-year Elements - Multiply the proportion of the building area renovated by the time elapsed since each renovation. Multiply the proportion not renovated (i.e. one minus the proportion renovated) by the age of the building up to and including 50 years. The sum of the two (or more) products equals the adjusted age of the 50-year elements.

(b) 25-year Elements - Multiply the proportion of the building area renovated by the time elapsed since each renovation. Multiply the proportion not renovated by the age of the building, up to and including 25 years. The sum of the two (or more) products equals the adjusted age of the 25-year elements.

(3) Calculate the current year Renewal Allowance for each facility as follows:

(a) 50-year Elements - Divide the building age (actual or adjusted), up to and including 50 years, by 1,275 (the sum of the years digits from 1 to 50). Multiply the quotient by the Maximum Renewal Allowance for 50-year elements and this product by the gross building area.

(b) 25-year Elements - Divide the building age (actual or adjusted), up to and including 25 years, by 325 (the sum of the years digits from 1 to 25). Multiply the quotient by the Maximum Renewal Allowance for 25-year elements and this product by the gross building area.

(c) Add products (a) and (b).

(4) Calculate a 50-year element renewal factor and a 25-year renewal factor for each facility as follows.

(a) 50-year Elements - Sum the numbers from 1 to the current (actual or adjusted) age of the building (up to 50 years) and divide by 1,275.

$$F_{50} = \frac{1 + 2 + 3 + \dots + \text{Current Age}}{1 + 2 + 3 + \dots + 49 + 50}$$

(b) 25-year Elements - Sum the numbers from 1 to the current (actual or adjusted) age of the building (up to 25 years) and divide by 325.

$$F_{25} = \frac{1 + 2 + 3 + \dots + \text{Current Age}}{1 + 2 + 3 + \dots + 24 + 25}$$

(5) Calculate the Renewal Backlog for each building as follows:

$$\text{Renewal Backlog} = (\text{50-year renewal factor}) \times (\text{50-year Maximum Renewal Allowance}) + (\text{25-year renewal factor}) \times (\text{25-year Maximum Renewal Allowance}).$$

(6) Sum the calculated current year Renewal Allowances and Renewal Backlogs for all campus facilities broken down by funding category (e.g. E&G, Auxiliary, Health Professions, etc.). The sum of the Renewal Backlogs represents current total renovation backlog. The sum of the current year Renewal Allowances will be the amount that should be appropriated for facility renewal for the current year.

Attachment 2 summarizes Renewal Allowances and Renewal Backlogs for all Alabama public postsecondary institutions of higher education, based on the Fall 2003 Facility Inventory, 2004 Space Data Reports and 2004 construction cost data.

SECTION D

DATA ELEMENTS SUPPORTING FUNDING FORMULAS

ALL PUBLIC INSTITUTIONS

This section presents the basic data elements and those derived statistics that are inputs to the formulas used by the Alabama Commission on Higher Education in determining the ACHE Standard for funding of Alabama public institutions of higher education.

2006-2007 ACADEMIC PROGRAM INPUTS	THREE YEAR AVERAGE					THREE YEAR AVERAGE					THREE YEAR AVERAGE					3 Yr Avg.
