

Charger Fit is proud to promote a healthy life style. We are excited to share with you the City of Huntsville's Greenway.

The City of Huntsville adopted its first Greenway Plan in 2006 to guide the development of greenways throughout the community. This Greenway Plan was updated in December 2017 through a partnership with The Land Trust of North Alabama and now includes a mix of trails, greenways, greenlinks and complete streets.

The revised greenway system will include 312 miles of interconnected trails – from river trails, to pedestrian/bike complete streets, paved pathways and hiking trails. Currently, there are about 73 miles of existing greenways and trails located throughout the Huntsville area. The City has budgeted 44 new miles for construction by 2023.
