RISE Assistance Device

Adam Elmore, Greg Duke, Chris Beckham, Michael Delp, Doug Hess, Anthony Jones, and Joshua Minott
Mechanical and Aerospace Engineering Department

Overview
A student design team from the MME Department has designed and developed a product to assist a four-year-old rural infant blinstein syndrome patient. The student design team worked with the RISE student to develop the RISE Assistance Device (RAD) has an electric powered lift mechanism that can be attached to the RISE student's frame. The RAD incorporates the RISE student's seated's seated form.

Methodology
The student design team worked on the National Aeronautics and Space Administration System Engineering Handbook to guide the following processes:
- Concept and Development Schedule
- Conceptual Questionnaire
- Concept Evaluation
- Concept Testing
- Concept Selection

Below are the complete RAD Assembly:

Results
The student design team ensured a methodical approach to the design and development of a quality product by learning to apply important concepts that are practiced in industry.
