Now accepting applications for 2022-2023 Science Ambassadors

The Science Ambassador program cultivating passionate College of Science student leaders who demonstrate the diversity of our community and are happy to share their UAH stories! Our ambassador team consists of knowledgeable student leaders who will provide you information on the exceptional academic, cultural, and social opportunities.

NEW THIS SUMMER: CS 596-01 Intensive Intro to Programming

This graduate course will take a student from introductory to junior level programming status. The primary language will be C/C++ but will also explore python and java.

Instructor: Beth Allen
Prerequisite: MA 172 Calculus B
Email info@cs.uah.edu with questions.

Congratulations graduates!

Whether you’re headed to graduate school, starting your career, taking a gap year, or anything else, we want to hear your story. Recall just a few years when it felt like this moment was SO far away? Be the inspiration for those in that scenario. Simply reply to this email with your name, what you’re headed to do next, and a photo of yourself.

Biology major Alexa Nolan awarded the Huntsville Association of Small Business in Advanced Technology scholarship

"She is among the top 2% of undergraduates I have encountered in the last 30 years as a researcher. She is bright, creative, self-motivated, and has an unusually high level of initiative and discipline. Any lab that hosts her will appreciate her dedication to research," says Dr. Paul Wolf, Professor and Chair of the Biological Sciences Department. Congratulations, Alexa!
