CONGRATULATIONS to the 573 undergraduate College of Science students who earned a spot on the Fall 2021 President’s and Dean’s lists!

Girls in Science and Engineering Days (GSED) is a morning of hands-on STEM (Science, Technology, Engineering, and Mathematics) activities designed just for girls in the 3rd through 5th grades.

GSED needs student volunteers to serve as Group Leaders for the event. Each GSED group will have two Group Leaders who will be responsible for getting their group to each STEM activity, help with snack time, and serve as a role model.

The event is Saturday, April 2, 2022 from 8:30am to 12:30pm. Group leaders will need to arrive by 7:45am. Lunch will be provided after the event ends.

Volunteers may be any gender that you identify as and should be in good academic standing at UAH.

Abstracts due on Feb. 4
Graduate students only.

The deadline has been extended to submit abstracts for the 2022 Graduate Poster Session, which will be on Monday, March 7, 2022 on the 2nd floor of the Charger Union from 11:00 am - 2:00 pm.

Current UAH graduate students from all disciplines and majors who have completed research or creative projects under the mentorship of faculty or research staff between Spring Semester 2021 through the deadline (February 4, 2022) are eligible and encouraged to apply.

Selected posters/creative projects will be judged and PRIZES will be awarded. The research or creative project can have been done outside of UAH, but the abstract and poster must be endorsed by a UAH faculty member or research staff. There is no cost to the student to apply or participate. Specific details about the application will be communicated to student's email.

2022 Scholarship Submissions due Feb. 28
The 2022 application window for Association for Women in Science (AWIS) scholarships is now open and includes a new award for undergraduate women in science. Submissions are due by February 28, 2022.

The annual awards include:
- One AWIS Distinguished Doctoral Research Scholarship ($10,000) awarded to an AWIS member whose dissertation research project is judged likely to make important and original contributions to her field.
- Up to four AWIS Opportunity Scholarships for Career Re-entry ($2,000 each) will be awarded to enable AWIS members to return to a STEM career after being out of the workforce for more than two years.

The Kirsten R. Lorentzen Award ($2000) will go to an undergraduate woman studying physics, geophysics or geoscience. Applicants must be active members of the Society of Physics national organization.

The Dr. Vicki L. Schechtman Scholarship ($2,000) will be awarded to a woman in her college freshman, sophomore, or junior year whose chosen field of study is one of the sciences recognized by the National Science Foundation.

This new scholarship was made possible by donations from Dr. Schechtman’s family and will continue to support the Institute’s diversity and inclusion programs.

2022 Summer Internship Applications due Feb. 15
The HudsonAlpha Institute for Biotechnology in Huntsville will be hosting summer internships for undergraduate and master’s level graduate students again this summer. The BioTrain Internship program is in its 14th year of placing students in engaging experiences in a wide variety of positions across the Institute and our associated companies.

This unique internship program accepts 20 - 30 interns each summer for a nine-week session that includes a week of Biotech Boot Camp and weekly professional development seminars in addition to eight weeks of employment for students.

The 2022 BioTrain Internship session will be held from May 31 - July 29.

IMPORTANT DATES
February | Advisors send updated undergraduate long range plans or senior review
March 21 | Summer & Fall 2022 registration opens
April 22 | Last day to withdraw from a SP22 course
