Table 1. Sample Student Comments

“Dr. Elliott does a wonderful job engaging his students in learning. I like how he incorporates videos and real-life situations to promote learning and understanding. I like how he asks for student feedback because it helps to know what is being learned. I also like the feedback on presentations and paper because it helps to know what needs to be worked on.”

Jeremy M. Elliott

“I felt that Jeremy was very knowledgeable and passionate about the subject he was teaching. He was able to provide real life examples that I will be able to take into my future classroom.”

“Dr. Elliott made it a priority to be as inclusive as possible to involve student participation and made it easy to work with him in class and outside of class and was easily available when assistance was needed.”

“The instruction was presented in a lecture and a cooperative learning style. I like that it was not just one way of being taught but that it was mixed up. The different teaching styles helped to keep me engaged yet it also helped me to know EXACTLY what was expected of me.”

“The instructor was very passionate and knowledgeable about the content of this course. He provided clear information on what is expected for each assignment and the course in general. I learned a lot from this instructor as it is clear that he has a passion for teaching and more specifically for physical education in schools.”

“Dr. Elliott is very knowledgeable and passionate about principals of coaching. He was easy to come to with questions and had no issues with helping you throughout the course. The big assignments were spaced out giving you plenty of time to do them and they also made perfect sense for the class. He also made you look at different problems and ways to attack them as a coach, overall excellent class and professor.”
